

Orthotic Insole CAD/CAM Suite

Your flexible and accurate
3D scanner for custom
orthotic insole design

www.autodesk.com/footwear

Are you looking for a high definition 3D plantar scanner that is
capable of scanning feet, foam boxes and casts?

Our iQube scanner enables you to create an accurate 3D scan from any type of model
or foot whether it be in your facility or out in the field.

Whether you need to scan a foot, a cast or a foam box, iQube is able
to produce high quality 3D images in seconds saving you time whilst
improving the quality of the orthotics.

Our job management software OrderManager enables the complete
order including the aligned scans and a digital prescription to be
automatically transferred to the laboratory.

The digital data can then be used to manufacture the custom orthotic
insoles using OrthoModel software or your existing orthotic CAD/CAM
software.

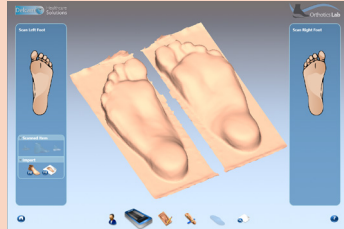

"It copes with any foam
box impression or cast our
customers care to throw at us"

Salts Techstep UK

- iQube has been designed to be the only scanner available that can capture foot scans, foam box and cast impressions
- The only scanner available that is able to capture weight-on, weight-off and semi-weight bearing scans
- Within seconds the iQube is able to deliver high quality 3D images
- iQube is developed and supported by a large and well established CAD/CAM company with over 300 employees and over 80 offices worldwide

Data Types

iQube is able to capture all types of data – foot, foam box and cast

Flexibility

The ability to capture foot scans via weight-on, weight-off and semi-weight bearing modes

Fast and accurate

The completed scans are accurate to within 0.4mm and can be retrieved within seconds

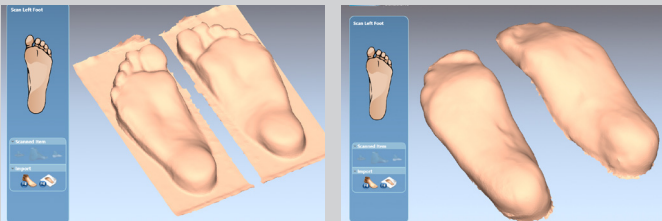

Portable

The scanner is lightweight and fully portable and comes with optional practitioner stand and carry case

Superior data quality

- When scanning the foot the iQube will capture the back of the heel as well as the plantar surface
- When scanning foam box and cast the iQube (E500 model only) will capture the deepest of cavities including undercuts

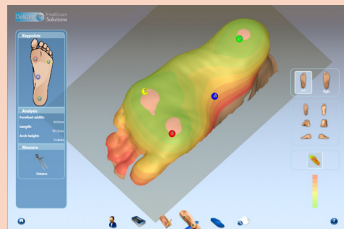

Workflow management

- iQube links directly with our OrderManager workflow software to seamlessly transfer order data from your customer to your manufacturing facility
- OrderManager enables you to manage all your production steps while giving you and your customers live updates on your entire manufacturing process

Scanner interface

iQube includes a scanning interface enabling you to capture patient data and create digital prescriptions

Facts and figures

iQube is fast, lightweight and accurate

Accuracy	+/- 0.4mm
Speed	6 seconds
Weight	17kg
Size	70cm x 38cm x 20cm 27.55" x 14.9" x 7.9"
