

Orthotic Insole CAD/CAM Suite

Your complete custom orthotic insole CAD solution

www.autodesk.com/footwear

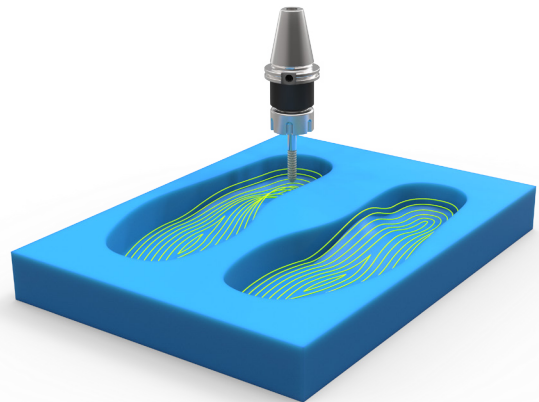

Are you looking for an open, flexible milling solution that allows you to machine custom orthotic insoles quickly with the mix of systems that suits your business?

OrthoMill allows you to choose the products and materials that best suit your business. Our solution offers you automatic machining whether you are milling on a single desktop machine or in different materials on multiple machines.

OrthoMill couples our 35 years of experience within the precision CAD and CAM markets with knowledge from leading practitioners worldwide.

The result is a solution which will dramatically reduce the cost and lead time of your custom orthotic insoles manufacturing process, while improving your product quality and clinical outcomes.

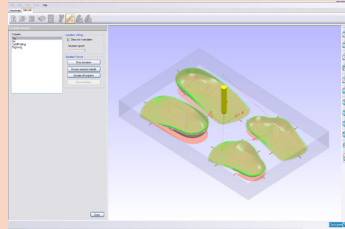

“We’ve implemented OrthoMill to eliminate the amount of mistakes made previously with cast preparation.”

Greg Sands, President, OrthoRite, USA

- Our open CAM solution is designed to give you a choice, allowing you to connect to the brand or size of milling machine that best suits your business
- OrthoMill is designed to mill all types of orthotic material, from EVA to polypropylene and cork using one of our proven milling strategies
- As part of an integrated CAD/CAM solution, OrthoMill allows you to automate your entire manufacturing process; further reducing your costs and manufacturing lead times
- Our open scan / CAD / CAM solution means that you can use our entire toolkit or a single product to build the digital solution which best meets your needs

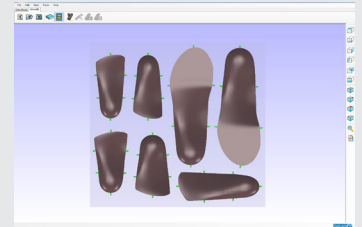

Speed

OrthoMill can automatically create your custom orthotics using parallel processing technology, allowing your team to focus on design

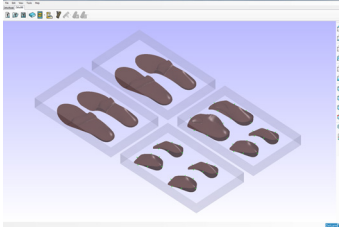

Simplicity

Our wizard type interface allows anyone to create toolpaths, significantly reducing training costs

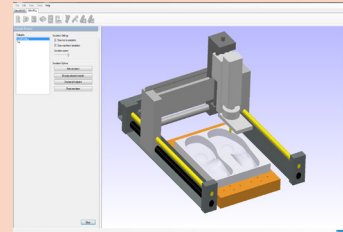

Flexibility

OrthoMill allows you to select any type of material, block size, milling pattern, step over, milling tools and speeds you need

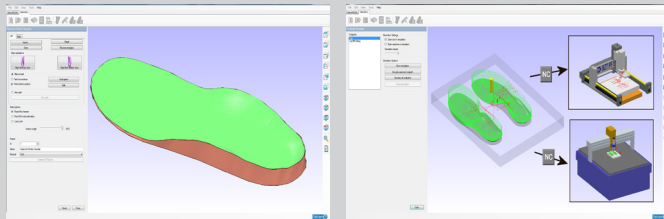

Control

You have complete control over your business growth. OrthoMill enables you to replace or add milling machines as required

Data input / output

- OrthoMill can receive 3D designs from your existing custom orthotic CAD product or you can benefit from OrthoMill's seamless link with our market leading OrthoMODEL CAD product
- OrthoMill is built upon our award winning PowerMILL software which ensures that OrthoMill can connect to any commercially available cutting machine or multiple machines that you choose

Workflow management

- OrthoMill links directly with our OrderManager workflow software to seamlessly transfer order data from your customer to your manufacturing facility
- OrderManager enables you to manage all your production steps while giving you and your customers live updates on your entire manufacturing process
