

Orthotic Insole CAD/CAM Suite

Your complete custom orthotic insole CAD solution

www.autodesk.com/footwear

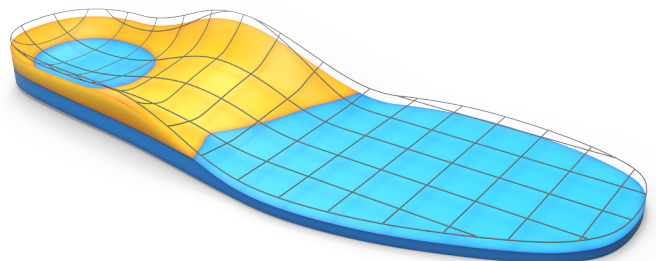

Are you looking for a tailored CAD solution which allows you to rapidly design the custom orthotic insole you want, every time?

OrthoModel offers you “real-time design” of both accommodative and corrective orthotic insoles, with a user interface that you can adapt to suit your needs, whether you are a practitioner or laboratory.

OrthoModel couples our 35 years of experience within the precision CAD and CAM markets with knowledge from leading practitioners worldwide.

The result is a solution which will dramatically reduce the cost and lead time of your custom orthotic insoles manufacturing process, while improving your product quality and clinical outcomes.

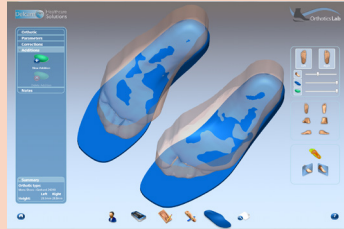

“Working together we came up
with leading edge technology
that would move us to the next
level”

Ray Margiano, Foot Solutions

- A simple user interface allows you or your customers to create unique custom insole designs in seconds
- As part of an integrated CAD/CAM solution, OrthoModel allows you to automate your entire manufacturing process; further reducing your costs and manufacturing lead times
- Simple and flexible workflows allow even casual users to scan and create designs without extensive training or software knowledge
- Our open scan / CAD / CAM solution allows you to use our entire toolkit or any product to build the digital solution which best meets your needs

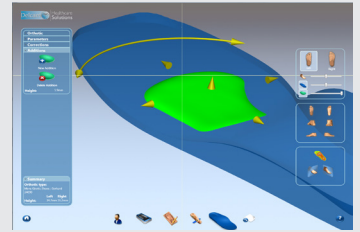

Speed

From 3D scanning to finished design in just a few minutes. Subsequent design changes are updated instantly

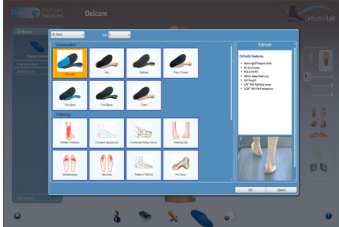

Simplicity

The simple user interface and workflow is streamlined to suit laboratories, practitioners or retail environments

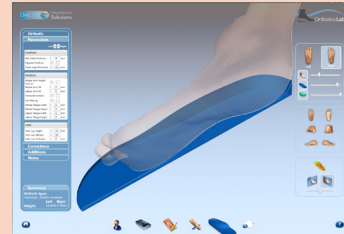

Flexibility

You can adapt OrthoModel to create your orthotics based upon pathology, shoe type, catalogue or even your available materials

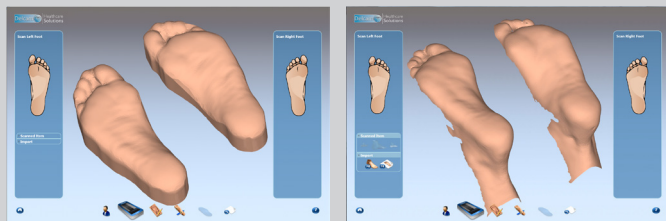

Control

OrthoModel allows you to interrogate the fit of the custom orthotic designed to the 3D scan of your customer's foot

Open data input / output

- OrthoModel can receive 3D and 2D scan data from your existing scanner or you can benefit from OrthoModel's integrated and seamless link with our range of iQube 3D plantar scanners
- OrthoModel can export completed designs to any third party CAM solution or you can benefit from the automation link between OrthoModel and OrthoMill to make CAM an automated invisible step

Workflow management

- OrthoModel links directly with our OrderManager workflow software to seamlessly transfer order data from your customer to your manufacturing facility
- OrderManager enables you to manage all your production steps while giving you and your customers live updates on your entire manufacturing process
